## activeFORMz HIGHLIGHTS

activeFORMz enables eFORMz projects to be used to deliver content to Web/GUI applications and/or Web Services while also processing input from these types of applications.

### ABOUT activeFORMz

activeFORMz is a new platform for creating form-based applications that extend the capabilities of eFORMz. Create web apps, that transform static documents and workflows into dynamic, interactive environments by leveraging web browser functionality all without the need for complex programming.

*a*ctiveFORMz  
*Endless Possibilities*

**Use activeFORMz  
to create apps that  
complement your  
eFORMz implementation.**

# APP SHOWCASE

---

The following Minisoft-developed apps can be seamlessly integrated into your existing business process or customized using activeFORMz to perfectly fit how your business runs.

## Archive

To send forms generated with eFORMz to a specific directory, with the ability to render them to the screen for preview, use the Archive App.

## Document Signing

Need to capture signatures from Android and iOS devices, and add them to a form? Look no further than the Document Signing App.

## Reprint

For the most part, your business process runs smoothly. Yet, every now and then, chaos strikes. Accidents happen, and when they do, you want to be able to hit a button and reprint the forms and labels you need. With Minisoft's Reprint App, you can do exactly that.

## Promotional Messaging

Looking for a way to adjust your corporate branding and messaging, without marketing personnel having to learn eFORMz? Control the look and feel of your forms, with the Promotional Messaging App.

## Touchpoint

Designed for retailers and manufacturers with a strong customer service focus, Touchpoint centralizes customer service requests, allowing companies to manage inbound emails, web form inquiries, share knowledge, and resolve customer issues.
